

Listen to our experts talk about the wildlife you can see here. Download our walk from www.viewranger.com

Short grass is great for rabbits. How many can you spot? Look out for clues like their poo!

Rabbits hide between the trees. Look carefully and move slowly.

What can you hear?
 Birds? Bikes? Boats?

Draw the shapes of the sounds you hear (closing your eyes helps).

Be a Nature Detective!

Birds need food!
 Watch them pecking crumbs from around the cafe and eating berries from the bushes.

House martins love swooping low across the ground to catch midges

Look out for bats at dusk

Blackbird

Robin

Chaffinch

Dunnock

How many birds can you see in 10 minutes?

WILD AT KIELDER ACTIVITY SHEET

Tower Knowe - On the peninsula

In summer there are lots of **butterflies** feeding on the meadow flowers. This is a **peacock** butterfly. See if you can find one and then colour this one in.

Keep your eyes peeled for our famous fishing **ospreys**.

Leaves are like nature's stained glass windows! Find some and hold them up to the light. Can you see the veins and cells?

Catkins

Rowan

Silver birch

Alder

There is another trig point on the other side of the water

This pillar is called a **trig point**. Trig points are on high points in the landscape and were used to make maps before we used satellites.

Two thousand years ago there was a small farm here. People had to get all they needed from this landscape. How would you get food and shelter?

See if you can find remains of the farm's stone walls

Roe deer

Mushroom soup

Crops on slopes

Raspberries

Bilberries

Remember some mushrooms and berries are poisonous!

Some treasure is hidden nearby! It's called a **geocache**. Go to www.geocaching.com to find out more.
